

Configuring Smart Address: Quick Start Guide

LinkPoint Connect: Cloud Edition (Exchange + Salesforce)

How to Configure Smart Address

Smart Address enables users to relate emails and calendar events to specific Salesforce What records such as Accounts or Opportunities by tagging items with unique identifiers.

1. Choose where you want to apply the changes: **Organization, Subscription, Profile, or My Settings**.
2. Select the **Edit** link to launch the Settings window.
3. Select the option **Enable Smart Address Sync**.
4. Select the **Sync Frequency** you would like to use.
5. Click **Save** to apply the changes. This will create unique Smart Addresses in an Exchange Contact Folder named **Smart Address**.
